

Your SEEK Story Framework

Use this section to build the narrative context for a learning project. SEEK grounds your learner in meaning before asking for effort.

The Story Foundation

16. What is the name of your learning project — course, program, training, coaching relationship, or curriculum?

17. Who is the central character of this story? (The learner themselves, a fictional user, a professional persona, etc.)

18. What challenge or problem does this character face at the beginning? Be specific and vivid.

19. What does the world look like once this character has successfully completed the learning journey?

The Narrative Arc

20. Write a 2-3 sentence story opener you could use to begin your course, session, program, or module. Make it personal and specific.

21. How will you weave this story throughout the material? Describe 2-3 places where the narrative will resurface.
